FULL-STACK SOFTWARE ENGINEER

Software Engineer with over 3 years of technical experience, specializing in building production-grade internal tools, AI-integrated workflows, and e-commerce platforms. Expertise in **Next.js**, **Python**, and **DevOps** environments.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3/Sass, SQL.
 - **Frontend:** React, Next.js, Tailwind CSS, Figma, UI/UX Design.
 - **Backend & Database:** Node.js, Flask, Django, Supabase (PostgreSQL), MongoDB, Sanity CMS.
 - **DevOps & Tools:** Docker, CI/CD (GitHub Actions), Linux (Debian), Stripe API, OpenAI API, Git.
-

PROFESSIONAL EXPERIENCE

OSTEOID INC. | San Jose, CA | Apr 2019 – Present

Clinical Consultant Supervisor & Internal Tools Developer

- Architected "ORION," a production-grade Next.js and Python chat application with task-specific fine-tuned GPT-4 models that generates client-ready emails from technician notes, reducing composition time from 5-10 minutes to under 30 seconds per case.
- Fine-tuned ORION's GPT-4.1 mini model on hundreds of labeled clinical cases, enabling accurate handling of complex technical scenarios including implant specifications and anatomical constraints.
- Implemented Cloudflare OTP authentication and RLS for ORION to secure patient and company-sensitive data.
- Developed Python scripts to automate weekly data collection workflows, reducing manual processing time from 1 hour to under 5 minutes through automated CMS queries and Google Sheets integration.
- Served as technical subject matter expert for 6,000+ oral surgeon implant cases, acting as liaison between technical and customer-facing teams.

INDEPENDENT SOFTWARE ENGINEER | San Jose, CA | Dec 2022 – Present

Client: That's What She Threads (E-Commerce Platform)

- Developed a responsive e-commerce application using Next.js and MongoDB, featuring a custom cookie-stored cart, mobile-optimized layout, and Sanity CMS backend for real-time product management.
- Integrated Stripe for payment processing and leveraged webhooks to sync order data with Printful API, fully automating the print-on-demand fulfillment lifecycle.
- Achieved near-perfect Lighthouse scores (100 SEO, 98 Performance) through server-side rendering and image optimization scripts (Cloudinary), ensuring sub-second load times.

Project: DNA Labs Hosting (DevOps Infrastructure)

- Designed and deployed a self-hosted infrastructure on Debian Linux using Traefik reverse proxy to serve multiple Next.js applications.
- Wrote GitHub Actions workflows that reduced deployment time by 70%, incorporating automated linting, building, and secure SSH transfer.
- Implemented automated SSL management (Let's Encrypt), key-based SSH authentication, and fail2ban to prevent brute-force attacks.
- Automated daily off-site backups using Rclone to encrypt and transfer data to cloud storage.

Project: PixelAngelo (AI Web Application)

- Built an image upscaling pipeline using Python and Flask, orchestrating Docker containers on Runpod serverless GPUs to utilize Real-ESRGAN models cost-effectively.
 - Created a hybrid storage solution using Backblaze B2 for handling large image binaries, reducing bandwidth costs while maintaining high availability.
-

EDUCATION

Coding Dojo | San Jose, CA | Full-Stack Developer Certificate

Cal State Monterey Bay | Seaside, CA | Bachelor of Science in Kinesiology
