Education

Cal State Monterey Bay • Bachelor of Science in Kinesiology • Seaside, CA

2018

Coding Dojo • Full-Stack Developer Certificate • San Jose, CA

2022

Skills

- Python, JavaScript, React, NextJS, Docker, CI/CD, Tailwind, Supabase, Git, Cloudflare, Stripe, OpenAI API, HTML/CSS
 - Project Management, Technical Documentation, Cross-functional Collaboration, UI/UX Planning, Problem-Solving
-

Experience

Consultant - Supervisor • *Osteoid Inc.* • San Jose, CA

April 2019 - Present

- Building "ORION," an internal AI assistant with Next.js and GPT-4 to streamline team workflows, automate task handling, and generate client-ready emails.
- Deployed MVP with secured Cloudflare OTP login, dynamic chat UI, and OpenAI API integration for live context-aware support.
- Planning integration of Supabase vector search and fine-tuned GPT prompts to support complex, task-specific workflows like kickback emails and protocol retrieval.
- Advised oral surgeons in 6,000+ implant cases using CAD software (Invivo7), ensuring accurate planning.

Full-Stack Developer • [That's What She Threads](#) • San Jose, CA

October 2024 - Present

- Developed a responsive Next.js e-commerce site for a client with UI/UX crafted in Figma and Inkscape, including a dynamic cookie-stored cart, legal pages, carousels, sorting, and mobile-to-desktop layouts.
- Built a backend with MongoDB and Sanity CMS for order tracking (via Stripe webhooks) and real-time product updates (titles, pricing, mockups), plus a search function querying Sanity.
- Integrated Stripe for payments and Printful for print-on-demand, using webhooks to sync order data across systems, automate order placement, and enable a custom email for shipping updates.
- Optimized SEO and performance, hitting Lighthouse scores of Performance: 98, Accessibility: 98, Best Practices: 100, SEO: 100 on desktop (high on mobile), ensuring fast load times.
- Wrote scripts to automate content, uploading mockups to Sanity, syncing Printful variants (sizes/colors), converting PNGs to WebP via Cloudinary, and optimizing image uploads.

DevOps Engineer • *DNA Labs Hosting* • San Jose, CA

June 2024 - Present

- Designed and deployed a VPS infrastructure with Traefik reverse proxy to host Next.js sites on Debian Linux.
- Developed CI/CD pipelines using GitHub Actions, reducing deployment time by 70% and incorporating automated testing and building.
- Implemented SSL certificate management with Let's Encrypt, enabling HTTPS and configured secure SSH access with key-based authentication and fail2ban to protect against unauthorized access attempts.
- Automated backups using rclone to securely transfer website data to off-site cloud storage and built E2E testing suite with pytest for graphical HTML reports.

Developer & Creator • [PixelAngelo - AI Image Upscaler](#) • [Github](#) • San Jose, CA

December 2023 - Present

- Developed with Python, Flask, NextJS, TailwindCSS, Docker, Runpod GPUs, and Backblaze B2 cloud storage.
- Utilized Real-ESRGAN image upscaling models to increase image resolution by two times.
- Customized a cloud-based architecture utilizing various APIs to interact with Runpod cloud-based GPUs and Backblaze B2 cloud storage.
- Incorporated a slider component to compare image resolution and quality between before and after images.
